

Warner's Pond Task Force - Small Group Meeting  
January 29, 2025, 4:30 - 6:30 PM (Zoom)

Present:

Jeff Collins  
Christine Denaro  
Keith Hannon  
Bill Kemeza  
Rachel Freed, CBI Facilitator

The meeting opened at 4:30 PM.

The Warner's Pond Task Force Small Group continued reviewing the dam removal proposal and making revisions or edits.

There was discussion on how to term greenhouse gases...either delete or use inconclusive in the proposal. No decision made.

Question about whether there should be a table of fish and wildlife species detailing what is there now, what would be there after dredging and after dam removal. This was determined to be too detailed at this time.

There was discussion about the channel width and depth after dam removal as well as the cost. Due to much disagreement, there was no resolution.

Several language issues were discussed. It was agreed to use "current best estimates". The same wording for water access would be used across all three proposals. There should also be consistency about sources and cost estimates. Footnotes are necessary for clarity.

It was determined that we needed another meeting plan to continue discussing various issues about the proposals.

No members of the public were present. The meeting was closed at 6:35 PM.

Respectfully submitted by Christine Denaro.
