

Warner's Pond Task Force - Small Group Meeting  
February 6, 2025, 6 - 7 PM (Zoom)

Present:

Jeff Collins  
Christine Denaro  
Keith Hannon  
Bill Kemeza  
Rachel Freed, CBI Facilitator

Rachel joined the meeting at 6:10 PM.

The Warner's Pond Task Force Small Group discussed uncertainties related to Starmet's capacity to take material from the North Field. Christine stated that if the dredging project was delayed, Starmet would still have the ability to stockpile the soil.

The group confirmed that the introduction to the proposal document covers costs, wildlife habitat and recreation.

Regarding costs, Jeff reported that he spoke with Malcolm, who obtained more estimates for the trails. Regarding the idea of constructing a raised platform over the wetlands, the response of the NRC seemed to suggest that the NRC was not supportive because there was a less invasive alternative location that would avoid work in wetlands. Therefore, the dam removal group is removing that amenity from the proposal. The new budget and graphics reflect that change.

The small group completed its review of the proposals.

There were no comments from the public. The meeting was adjourned at 7:08 PM.
